Education

2012 - 2016

Bachelor of Science: Mechatronics And Robotics

ITMO University, Saint-Petersburg

Skills

- Python
- Microservices
- FastAPI
- Docker
- PostgresSQL
- CI/CD

Tools

- Docker
- Django
- FastAPI
- Linux
- Bash
- Git

Boris Testov
Senior Software Engineer

Senior Software Engineer with 10 years building scalable backend systems in Python. Specialized in microservices, CI/CD workflows, and computer vision. Currently developing financial technology solutions while mentoring engineering teams.

Experience (last 3 jobs)

2022 - Current
FinDev LLC
Software Engineer

- Significantly improved response times through asynchronous programming and optimization
- Delivered critical financial tools on schedule for analyst teams
- Mentored team members on Python best practices and clean code principles
- Established reliable CI/CD pipelines reducing deployment issues
- Built robust backend systems handling financial calculations and reporting

2022
Protei LLC
Development Team Lead

- Led cross-functional engineering team of 8 developers
- Implemented structured goal-setting ensuring on-time project delivery
- Developed systematic problem-solving processes improving team efficiency
- Created professional development pathways and mentored team members
- Improved communication between technical teams and executive leadership

2019 - 2022
Protei LLC
Computer Vision Engineer

- Built video analytics systems for pedestrian and vehicle tracking
- Developed ANPR system improving parking management efficiency
- Modernized legacy systems using Docker and microservices architecture
- Established CI/CD pipeline with TeamCity for automated deployments
- Worked with C++, Python, OpenCV for computer vision applications
